

# INFRASOUND-SENSOR

## ADXIII-INFO1LE

**Infrasound consists of three sensors:**

- (1) HF: 1000Hz - 0.1Hz  
±71Pa (16bit resolution )  
capacitive differential  
pressure infrasound sensor.
- (2) MF: 6.25Hz - 0.001Hz  
±733.4Pa (22bit resolution )  
electromagnetic induction  
differential pressure infasound sensor .
- (3) LF: 0.1Hz - DC (26Kpa-126Kpa)  
(24bit resolution ) precision barometer.

**Included Peripheral Sensors:**

- (1) 3-axis acceleration sensors.(0-1960gal 0.19-25Hz)
- (2) temperature sensors.  
Infrasound sensor MF, print circuit board , Device.
- (3) GPS.

### Interface

Ethernet / RS232C(UART) 921.6Kbps or 115.2Kbps

Ring buffering (High speed)

or block polling (Low latency, Low CPU load).

### Software

Windows Application : MultiloggerX3.

Windows API : ADioxX3-API.

Raspi : Sample software.

Others: Register map.
